# The 7 Elements of Art

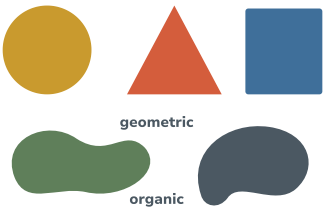

cleancutsvg.com/free-art-lessons-for-kids

The seven elements of art are the building blocks of every drawing, painting, sculpture and design.

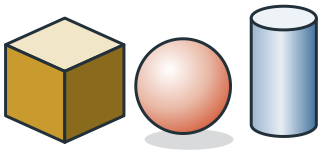

## Line

A mark that moves from one point to another: straight, curved, zigzag, broken, thick or thin.

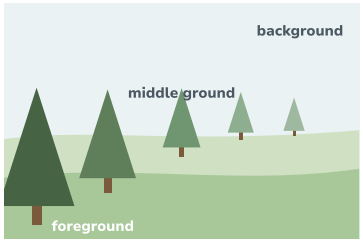

## Shape

A flat, closed area with height and width. Geometric shapes have exact edges; organic shapes are free-form.

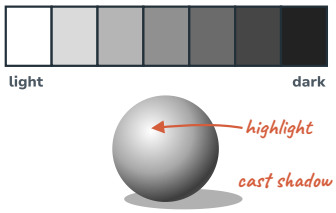

## Form

An object with height, width and depth. Shading makes a flat shape look like a form.

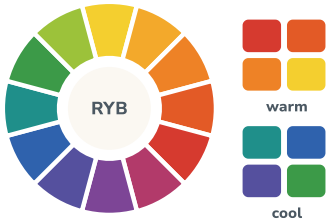

## Space

The area around, between and inside things. Overlap, size and placement show near and far.

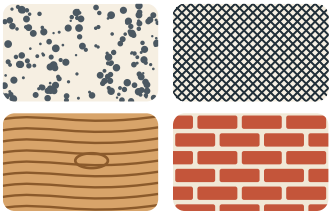

## Value

How light or dark something is. A value scale runs from white to black.

## Color

Hue (the color's name), value (light or dark) and intensity (bright or dull).

## Texture

How a surface feels, or looks like it would feel: rough, smooth, bumpy, soft.

## Remember them

Look at any artwork and name one element you see. Then ask: which element did the artist use the most?

Teachers, librarians, homeschool families and groups may print and copy these sheets for their students. Please don't sell them.
